### Spec

Cat No	Description	Packaging
ZP-A221101	6-Well Cell Culture Plates, Flat Bottom, Sterilised	1 piece/box
ZP-A221102	12-Well Cell Culture Plates, Flat Bottom, Sterilised	1 piece/box
ZP-A221103	24-Well Cell Culture Plates, Flat Bottom, Sterilised	1 piece/box
ZP-A221104	48 Well Cell Culture Plate, Flat Bottom, Sterilised	1 piece/box
ZP-A221105	96-Well Cell Culture Plates, Flat Bottom, Sterilised	1pc/box
ZP-A221106	96-Well Cell Culture Plates, U-Bottom, Sterilised	1pc/box
ZP-A221107	96-Well Cell Culture Plate, V-Bottom, Sterilised	1 piece/box
ZP-A222101	6-Well Cell Culture Plates, Flat Bottom, TC Treated, Sterilised	1 piece/box
ZP-A222102	12-Well Cell Culture Plates, Flat Bottom, TC Treated, Sterilised	1 piece/box
ZP-A222103	24-Well Cell Culture Plates, Flat Bottom, TC Treated, Sterilised	1 piece/box
ZP-A222104	48-Well Cell Culture Plates, Flat Bottom, TC Treated, Sterilised	1 piece/box
ZP-A222105	96-well Cell Culture Plate, Flat Bottom, TC Treated, Sterilised	1pc/box

### Features:

#### Cell Culture Plate

1. Made of high transparent polystyrene, high definition, uniform thickness, no surface distortion;
2. No heat source, no endotoxin, no DNase/RNase;
3. Each hole is coded and labelled for easy differentiation and identification;
4. Each culture plate is aseptically and individually packed, moisture-proof, humidity-proof and water-proof;

## Item Cell Culture Dish

### Spec

Cat No	Description	Packaging
ZP-A211107	35mm Cell Culture Dish, Sterilised	10 sets/pack
ZP-A211108	60mm Cell Culture Dish, Sterilised	10 sets/pack
ZP-A211111	100mm Cell Culture Dish, Sterilised	10 sets/pack
ZP-A211112	150mm Cell Culture Dish, Sterilised	5 sets/pack
ZP-A212105	35mm Cell Culture Dish, TC Treated, Sterilised	10 sets/pack
ZP-A212106	60mm Cell Culture Dish, TC Treated, Sterilised	10 sets/pack
ZP-A212107	100mm Cell Culture Dish, TC Treated, Sterilised	10 sets/pack
ZP-A212108	150mm Cell Culture Dish, TC Treated, Sterilised	5 sets/pack

### Features:

1. Made of high transparent polystyrene, flat and transparent bottom, no optical distortion and deformation under microscope;
2. 100,000 grade clean room production, no DNase/RNase, no heat source;
3. Petri dish lid ventilation grill design, ensure gas exchange;
4. Stacking design makes stacking and storage easier;
5. Optional vacuum plasma treatment (TC treatment) on the surface of Petri dishes, excellent adherence, more suitable for adherent cell culture.

Our accessories are of superior quality, and support for customisation.

## Item PCR eight rows of tubes

### Spec

Cat No	Description	Packaging
ZP-A521101	0.1ml PCR Eight Row Tube Set, Flat Cap, Clear Body, Clear Cap	125 rows/pack
ZP-A521102	0.1ml PCR Eight Row Tube Set, Flat Cap, White Body, Transparent Cap	125 Rows/Pack
ZP-A521103	0.2ml PCR Eight Row Tube Set, Flat Cap, Clear Body, Clear Cap	125 Rows/Pack
ZP-A521104	0.2ml PCR Eight Row Tube Set, Flat Cap, White Body, Transparent Cap	125 rows/pack

### Features:

PCR eight-row tube has the advantages of excellent sealing of the cap and good smoothness of the opening cap, which can effectively reduce the evaporation rate.No DNA enzyme, RNA enzyme, no pyrogen, no inhibitor contamination.

With direction hole, easy to identify the direction.White colour can effectively prevent signal interference and increase the sensitivity and homogeneity of the experiment.With the performance of autoclavable.

Our accessories are of superior quality, and support for customisation.

## Item Microcentrifuge tube

### Spec

Cat No	Description	Packaging
ZP-A311101	0.6 ml microcentrifuge tubes, conical bottom with cap, non-sterile	1000pcs/pack
ZP-A311102	1.5ml microcentrifuge tubes, conical bottom with cap, non-sterile	500pcs/pack
ZP-A311103	2.0ml microcentrifuge tubes, conical bottom with cap, non-sterile	500pcs/pack
ZP-A311104	0.6 ml microcentrifuge tubes, conical bottom with cap, sterilised	1000pcs/pack
ZP-A311105	1.5ml microcentrifuge tubes, conical bottom with cap, sterilised	500pcs/pack
ZP-A311106	2.0 ml microcentrifuge tubes, conical bottom with cap, sterilised	500pcs/pack

### Features:

1. The raw material of the tube body is made of polypropylene (PP), highly transparent, easy for sample observation;
2. 100,000 grade clean room production, no DNA enzyme, RNA enzyme, no pyrogen, no endotoxin;
3. Sterilisation model is electron beam sterilisation;
4. Ultra-fine polishing, the inner wall of the test tube is smooth;
5. Reinforced tube cap design to improve product sealing and prevent liquid leakage;
6. Clear scale lines on the tube body;
7. Can withstand centrifugal force of up to 20,000 RCF.

ZP-C1130115	8mm*50mm C type PTFE magnetic stirrer, C8*50	Bulk

## Features:

1. Made of polytetrafluoroethylene, mostly used for laboratory reagent stirring;
2. High temperature acid and alkali resistant, made of permanent magnetic steel;
3. Type A stirrer is pointed at both ends, also known as olive type, fitting round-bottomed containers with smooth surface, mainly used for round-bottomed containers;
4. Type B stirrer has a raised ring in the middle, also known as cylindrical with hoop, rotating with the center ring as the pivot point, circulating up and down, swinging left and right for even mixing, mainly used for flat-bottomed containers;
5. C type stirrer is cylindrical, mainly used for flat-bottomed containers, rotating against the bottom, strong magnetic force, strong stirring, wide range of applications..

## Features:

1. Adopting high purity polypropylene material and precision moulds to ensure product quality as well as dimensional stability;
2. 100,000 grade clean room production, no RNase, no DNase, no protease, no pyrogen;
3. Strong adaptability, can be suitable for a variety of brands of pipettes at home and abroad, the inner wall of the tube is smooth, the liquid residue is reduced to a minimum, to ensure the accuracy of suction;
4. Transparent material, not easy to wear and tear, easy to use when observing the liquid level; high strength, hard and solid tube mouth, good temperature resistance:  $-80\text{ }^{\circ}\text{C}$   $-121\text{ }^{\circ}\text{C}$ , high temperature and high pressure without deformation;
5. Complete specifications, two packages to choose from: bagged, boxed

### Features:

#### Cell culture flasks

1. High-definition polystyrene material, uniform thickness without distortion;
2. Clear scale, bottle side frosted design, easy to write;
3. Stacking design for easy storage;
4. No heat source, no endotoxin, no DNase/RNase;
5. 100% rigorous in-line air tightness test to ensure no leakage;

ZP-A312104	50ml centrifuge tube, conical bottom with lid, sterilized	25 pieces/pack 20 packs/box

## Features:

1. The raw material of tube body is made of polypropylene (PP), highly transparent, easy for sample observation;
2. 100,000 grade clean room production, no DNA enzyme, RNA enzyme, no pyrogen, no endotoxin;
3. Sterilisation model is electron beam sterilisation;
4. Ultra-fine polishing, smooth inner wall of the test tube, double-threaded design of the cap to enhance the sealing, easy to operate with one hand and improve work efficiency;
5. Low adsorption, with high hydrophobicity, to ensure accurate experiments;
6. Clear scale lines on the tube body, large white writing area for marking;
7. Can withstand centrifugal force of up to 12000RCF.

ZP-C1232101	3L 3L polyester sampling bag (odor bag), stainless steel connector	Bulk
ZP-C1232102	10L 10L polyester sampling bag (odor bag), stainless steel connector	Bulk

### Features:

1. The bag is made of polyester material, has stable performance, is odorless and pollution-free, and is suitable for collecting organized odors and odorous gases from pollution sources;
2. The PTFE joint is easy to use and quick to operate; the stainless steel joint is safe and firm and has strong sealing performance;
3. Widely used in various laboratories, testing companies, testing stations and other environmental protection agencies;
4. Precision processing, colorless and odorless, resistant to tearing and crushing;

ZP-C1222102	500ml sterile water sample bag, containing sulfur	10 pcs/pack 200 pcs/carton

### Features:

1. Made of high-quality polyethylene material, with high transparency and not easy to break;
2. Irradiation sterilization;
3. The round bottom bag can be erected for easy placement and removal;
4. The screw sealing cover has strong sealing performance and is not easy to leak;
5. Good barrier properties, waterproof, moisture-proof, oxygen-proof, strong mechanical properties, high blast resistance, puncture resistance and tear resistance;

## Features:

1. The aseptic homogenizing bag is made of polyethylene composite material, it is a safe and non-polluting sampling container, which can ensure the reliability of the analysis results, and is used for microbiological experiments, aseptic homogenization and sampling;
2. The product is irradiated and sterilized, and a variety of models are available;
3. Strong sealing, no liquid leakage, wide welding at the bottom of the bag to prevent rupture;
4. High transparency, easy to observe;

### Features:

pp reagent bottle

1. Provide translucent and brown two choices, PP material, temperature  $-20\text{ }^{\circ}\text{C} \sim 121\text{ }^{\circ}\text{C}$ , can be autoclaved, semi-transparent bottle, more conducive to check the status of the reagent

. Divided into narrow mouth and wide mouth, narrow mouth is convenient for liquid pouring, and can avoid reagent volatilisation; wide mouth design is easy to fill with dry items or liquids, both of them are suitable for reagent storage, sampling, transport and packaging.

3. Excellent resistance to most acids, bases and alcohols.

4. Brown reagent bottles are made of special brown masterbatch, ideal for storing photosensitive substances..

## Features:

1. Low retention tips have a very smooth and durable evacuated surface that provides optimal sample recovery;
2. Typically used for pipetting high viscosity, detergent-containing liquids;
3. The surface is highly resistant to chemicals, ensuring sample and result integrity;
4. No RNase, no DNase, no protease, no pyrogens.

### Features:

#### Pasteur pipette

1. Made of low density polyethylene (LDPE) raw material, 100,000 class clean workshop production;
2. No pyrogen, no endotoxin, no cytotoxicity;
3. The tube wall is translucent, uniform thickness, moderate elasticity, stable suction, and the tube body has a pressure film scale for easy measurement;
4. The tube body is soft and can be used for aspiration operation from narrow or curved containers;
5. Sterilised or not, sterilised models are packed independently, easy to carry and use;Picture

## Item Serum Pipettes

Cat No	Description	Packaging
ZP-D411101	1ml disposable serum pipette, sterile and individually wrapped	50pcs/pack
ZP-D411102	2ml disposable serum pipette, aseptic individual packaging	50pcs/pack
ZP-D411103	5ml disposable serum pipette, aseptic individual packaging	50pcs/pack
ZP-D411104	10ml disposable serum pipette, aseptic individual packaging	50pcs/pack
ZP-D411105	25ml disposable serum pipette, aseptic individual packaging	25pcs/pack
ZP-D411106	50ml disposable serum pipette, aseptic individual packaging	20pcs/pack

### Features:

#### Serum Pipettes

1. Made of imported high quality polystyrene (GPPS) raw materials, 100,000 grade clean room production, scientific pipette mouth design can be adapted to most of the pipettes on the market;
2. In addition to the different precision scale markings on the body of the tube, different colour rings are used to mark different volume specifications, which makes it easier to identify and use when working;
3. Sterile without heat source, DNA enzyme and RNA enzyme, endotoxin and cytotoxicity;
4. Individually packed in paper-plastic bags to prevent contamination
5. Smooth inner and outer walls to avoid drawing and liquid residue; two-way scale design, can be well matched with the requirements of sample addition and sample reduction
6. polyolefin filter cartridge;

## Features:

1. Suitable for industrial microbial strain screening, large-scale fermentation test, seed culture, etc. It can also be used for medium configuration, mixing and storage;
2. Two materials are available: polycarbonate (PC)/polyester film (PETG) for the bottle body, and two cap types are available: sealing cap/filter film cap; cap: high-density polyethylene (HDPE), filter film: polytetrafluoroethylene (PTFE);
3. Individually sterilised packaging, no DNase/RNase, no heat source, no cytotoxicity;
4. Flat-bottomed triangular shaking bottle can be stably placed on the shaker, which can effectively control the production of foam volume, lengthened neck for easy access, with a liquid-conducting groove at the mouth of the bottle, anti-hanging liquid, easy to pour; triangular shaking bottle with a baffle to increase the efficiency of the aeration and increase the shear force on the samples;
5. Smooth inner appearance of the bottle, clear scale, easy to observe.;
